SUMMARY

Software Developer with hands-on experience building scalable web applications and RESTful APIs using React.js, Node.js, and Express.js. Strong in database design, API optimization, and responsive UI development, with exposure to Agile workflows, CI/CD, and cloud deployment. Focused on writing clean, efficient code and delivering high-performance solutions.

EDUCATION

Technocrats Institute of Technology, Bhopal — Bhopal, India
Bachelors of Technology; GPA: 7.01 — **June 2023 – June 2027**

SKILLS SUMMARY

- **Language**: Java
- **Frontend**: React.js, Tailwind, Material UI, CSS3, HTML5, JavaScript, TypeScript
- **Backend:** Express, Node.js, MySQL,MongoDB
- **Tools**: Git, GitHub, CI/CD (GitHub Actions), Postman, Docker, Redux, ORM
- **Core Concepts**: Data Structures & Algorithms, Time Complexity, OOPS, System Architecture, Operating Systems Fundamentals, REST Architecture
- **Data:** Data pipelines, schema design, backend data processing

WORK EXPERIENCE

Software Developer Intern | Tryidol Technologies | CERTIFICATE — **Dec 2025 - March 2026**

- Designed and developed RESTful APIs using Node.js and Express, following clean architecture principles.
- Optimized backend performance and improved API response time through efficient query handling
- Implemented unit testing and debugging strategies to ensure system reliability and performance
- Collaborated in Agile (Scrum) environment with sprint planning, code reviews, and version control using Git

MERN Stack Developer | AVM Welfare — **Jan 2025 - April 2025**

- Developed a responsive MERN-based student progress portal adopted across multiple departments, improving daily data tracking efficiency by **30%**.
- Optimized frontend–backend communication, cutting API response delay by **25%** and improving overall page interactivity.
- Identified and resolved UI inconsistencies and runtime bugs, reducing user-reported issues by **50%** during testing cycles.

PROJECTS

HRMS Dashboard System – MERN Stack Platform | LINK — **December 2025 – March 2026**

Tech Stack: React.js, Node.js, Express.js, Socket.IO, JWT, Git, Jest, CI/CD

- Engineered a **full-stack HRMS platform** with modular backend architecture supporting **Admin and Manager role-based access**, enabling centralized management of users, attendance, leave policies, and recruitment workflows.
- Implemented **secure authentication architecture** using **JWT session tokens, email OTP verification, and IP-based access control** to protect system endpoints and user data.
- Designed a **policy-driven attendance and leave management system** supporting configurable rules such as **grace time, overtime calculation, and approval workflows.**
- Built a **job requisition and recruitment pipeline** to track candidate progression across hiring stages and manage interview workflows.
- Integrated **WebSocket** for real-time updates, allowing live dashboard changes and approval status updates without page refresh.
- Improved backend efficiency through **API** and database query optimization, and ensured reliability using **Jest unit testing**, Git-based version control, **CI/CD pipelines**, and **Code-Rabbit** automated code review.
- Built a production-ready HRMS **SaaS platform** supporting real-time updates and scalable role-based workflows.

CERTIFICATES

Oracle Cloud Infrastructure Certification (2025) | CERTIFICATE — **October 2025**

- Certified on core OCI services including compute, networking, storage, identity, and cloud deployment fundamentals.

IBM Artificial Intelligence Certification (2024) | CERTIFICATE — **August 2024**

- Completed training on AI concepts covering ML workflows, data preprocessing, and big-data fundamentals.

WIPRO ML & ML-Ops Project Certification | CERTIFICATE — **November 2024**
